## PROFILE

B.Tech CSE (Data Science) student with hands-on AI Engineer internship experience building production-grade Generative AI systems, LLM applications, and RAG pipelines. Proficient in Python, PyTorch, LangChain, FastAPI, and Groq API with focus on prompt engineering, semantic search, and scalable AI architecture.

## EXPERIENCE

### AI/ML Engineer Intern

*HiLearn Technology*

Feb 2026 – Present

*Ahmedabad, India*

- Deployed production RAG microservice (FastAPI + ChromaDB + SentenceTransformers + Groq llama-3.3-70b) enabling semantic search, LLM-powered Q&A, summarization, and quiz auto-generation; integrated with Node.js/React LMS via REST APIs.
- Built agentic AI children learning system (Alexi) using GPT-4o-mini and Flask; engineered face recognition attendance (dlib) and NLP-based multimodal mood detection to personalize LLM responses dynamically.
- Integrated YouTube Data API v3 and Wikipedia Commons for dynamic media fetching, eliminating hallucinated LLM URLs; implemented Twilio WhatsApp API for automated parent notifications.
- Deployed REST APIs with CI/CD via GitHub Actions; applied prompt engineering across all system prompts; collaborated in cross-functional team using Git branching.

## PROJECTS

### Enterprise Multimodal RAG Chatbot | *Python, LangChain, HuggingFace, ChromaDB, FastAPI, Streamlit* |

- Built end-to-end RAG pipeline processing 250+ pages of documentation using text chunking, sentence transformer embeddings, and ChromaDB vector database for semantic knowledge retrieval.
- Achieved 94% semantic search precision and sub-3-second query latency; deployed containerized Streamlit app reducing documentation retrieval time by 70%.

### Production Multimodal Sentiment Analysis Engine | *Python, PyTorch, HuggingFace, BERT, Streamlit* |

- Fine-tuned BERT on 1,000+ samples achieving 89% accuracy in multi-class emotion classification; built PyTorch CNN for audio emotion recognition using Mel-spectrogram features on RAVDESS dataset.
- Deployed real-time multimodal Streamlit web app for live sentiment feedback, reducing manual feedback processing by 12+ hours/week.

## EDUCATION

### Dr. APJ Abdul Kalam Technical University

*Bachelor of Technology in Computer Science Engineering (Data Science)*

2023 – 2027

*CGPA: 8.0/10*

## TECHNICAL SKILLS

**Languages:** Python, Java, C++, SQL, PostgreSQL

**ML & Deep Learning:** PyTorch, Scikit-learn, HuggingFace, BERT, CNN, Fine-Tuning, FAISS

**Generative AI & LLMs:** LangChain, RAG, Groq API, GPT-4o-mini, Whisper, Prompt Engineering, AI Agents, LLM Evaluation, MCP

**NLP & Vector Search:** SentenceTransformers, ChromaDB, Embeddings, Semantic Search, Multimodal AI

**Full-Stack:** React.js, Node.js, Express.js, MongoDB, Next.js

**Deployment & MLOps:** FastAPI, Flask, Docker, GitHub Actions, CI/CD, Railway, Streamlit, Git

## CERTIFICATIONS

IBM – Deep Learning Fundamentals (Cognitive Class) · Google Cloud – Introduction to Generative AI · Infosys Springboard – Python Programming Certification
